HENRIK STENSON GOLF DESIGN

Osterakers Golf in cooperation with Henrik Stenson Golf Design

Osterakers Golf Club announces that during the next coming years Henrik Stenson Golf Design will redesign the present courses of 45 holes to 36 holes.

The commitment is Henrik Stensons first design project. The project comprises to create a Master Plan including the design of *two 18 holes courses, a par 3-hole short course, a practice area* and some other things. The work will start now. This project overlaps another ongoing project by which the club creates an integration of residential areas with the golf courses.

"It is absolutely fantastic that my first project will be in my native country! My team and I are honored and excited to work closely with Osterakers Golf Club to elevate the club's courses to one of the best facilities in Scandinavia."

says Henrik Stenson

"After a narrow selection process of partners we are now most proud to appoint Henrik Stenson Golf Design for this unique Swedish project. Henrik Stenson has a worldwide specific experience from golf courses all over the world and we feel most convinced that Henrik with his team will prove to be the best partner for us. Osterakers Golf has for a number of years purposefully worked for developing its area of land to comprise also a residential and a commercial area. This ongoing project will entirely finance the project to redesign the golf courses without any contribution from the members."

says Andreas Ljunggren, Managing Director, Osterakers Golf
